

Special Tribunal Upper Hurunui River Water Conservation Order

I support the Upper Hurunui River Water Conservation Order. I believe that the river has outstanding recreational attributes and that the river is an outstanding amenity with intrinsic values.

I want to see healthy river flows maintained on the river. I do not want to see a dam on it.

I support Forest and Bird who are seeking that the Mandamus tributary and the lower Hurunui River be added to the Water Conservation Order to protect native fish and birdlife, especially black-fronted tern and black-billed gull. I do not want to see developers dam Lake Sumner and the South Branch of the Hurunui River.

Yours sincerely
