I/we make my/our submission concerning all notices of requirements and applications for resource consents below.

The reasons for my/our submission are:

I oppose all these applications by Transpower as I consider

They give rise to significant and unacceptable adverse effects on the environment, in particular adverse visual and amenity impacts.

The applications do not adequately avoid, remedy or mitigate the cumulative adverse effects of the proposed new line being in close proximity to the existing OTA-WKM A B and C lines through the Hunua and Paparimu Valley settlements

The application does not give a detailed visual impact assessment for the entire line encompassing a before and after drive by and fly over.

The life expectancy of the proposed infrastructure could be up to 100years. The proposal should be assessed against the possibility of urban and rural growth over 100 years or more. Pylons of the scale proposed are incompatible with possible future urban and peri-urban densities on the current Auckland urban boundaries.

I seek the following decision from the Board of Inquiry

That the proposal be declined in its entirety

In the event that the above relief sought is not granted, the Proposal be approved only if it is amended to or is made subject to conditions that require Transpower to

Underground a greater extent of the line than is currently proposed including in particular the line along that part of the route between its northern terminus and State Highway 2 to the south.
