Please tick the relevant boxes on the next page to identify whether you are making a submission on all notices of requirement and applications for resource consents or just some of them (please identify).

Please also indicate on the back of this form (✓) whether you support, oppose, or are neutral in relation to the notice(s) of requirement and applications for resource consents. If you are making a submission only on parts of a notice of requirement or application for resource consents, please note this when specifying the reasons for your submission.

The reasons for my/our submission are:

- 1) General visual and environmental effects and specific impacts on our home and on our property.
- 2) An easement requirement inconsistent with modern international practice.
- 3) Faulty Transpower arguments in respect of security of supply to Auckland.
- 4) Discomfort with the onus this development will place on future generations of New Zealanders if allowed to proceed as described.
- 5) Lack of consistency in demand forecasting both from Transpower and from the Electricity Commission.

If you are attaching further information tick (✓) for yes

Please use more pages if you need to.

I/we seek the following decision from the Board of Inquiry (provide precise details including the nature of any conditions sought):

An alternative 220kV line to be built on lower towers to replace the existing 110kV ARAPAK line. This line to be undergrounded as far as technically feasible (at least 30 km. from Otahuhu) with upgrades to existing lines to achieve the required level of supply.

Please use more pages if you need to.

Use a clear tick in the appropriate box below (✓)

I/we wish to be heard in support of my/our submission (to speak at the public hearing).

I/we DO NOT wish to be heard and hereby make my/our submission in writing only.
