Below is my submission - please note it is different from Beckys although sent from her hotmail address.

Regards

Andrew

There are other more viable options and Transpower have resorted to ruining lovely farm land which holds many special family memories. The cost to my family (and others) has already been horrendous, physically, emotionally & financially. Are we expected to continue fighting on our own?

Please remember we are real people, not names on paper.

Andrew Riley

Re: Submission to Ministry of environment & Transpower

I am totally opposed to the 400k lines, and associated transmission towers, proposed from Whakamaru to South Auckland.

The basis for my opposition is;

There are other more environmentally & financially viable alternatives that should be undertaken in preference to this outrageous proposal.

I wish to speak to the above submission.

Yours faithfully

Andrew Riley
