Name: Christine Brenda Tait
Phone: (07) 8273906
Email: tina_tait@extra.co.nz
Yes: I/we wish to be heard in support of my/our submission at the public hearing, and expect I will need between one and two hours to present my evidence. I would like the location of the portion of the hearing which will receive my evidence to be held in a local venue near to where I live.
submitter: Christine Brenda TAIT
A: copy of this submission has been emailed to Transpower.
Scope: This submission covers all notices of requirements and applications for resource consents relating Transpower's applications that will be heard by this Board of Inquiry. The references are NORs 27619, L07089, DES0011/07, RMR200621, DN/0006/07, 240/021, RM070209, and resource consents 34102, 34370, 34372, 34373, 34711, 34712, 116902, 116903, 116904, 116905, and any other NORs or resource consent applications that may subsequently be filed or altered. We oppose all of these NORs and applications for resource consent.
Re: This submission relates to the notices of requirement and/or applications for resource consent, lodged by Transpower New Zealand Ltd for the North Island Grid Upgrade Project, and identified above.

RD4 TeMiro

Cambridge

Reasons:

I am extremely opposed to Transpower building this un-needed line, as the projected demands published by the Electricity Commission (2007 SOO) just cannot justify its construction. The huge scale and over capacity of this proposed 400kV capable line is completely wrong when viewed as the expected transmission capacity into Auckland to meet demand growth in the next 40 years. Any new generation capacity that will be constructed in the Auckland region in the next 40 years has been grossly underestimated in an attempt to justify this line as one of national importance significance and urgency.

Much better alternatives to this proposed line are available that have a much reduced environmental impact, such as the most obvious - more generation in the Auckland region, upgrading the actual wiring of the Whakamaru A, B and C lines, use of HVDC transmission technology which will be less obtrusive and easier to underground, more extensive use of undergrounding of HVAC lines, and consideration of new conventional small scale 220kV transmission lines.

I totally oppose this line being built on a 65 metre wide easement, when a 600 metre wide easement, free of houses and workplaces, should be demanded as a minimum precautionary principle to reduce the possibility of future health risks and environmental impacts.

I will actively oppose any large scale HVAC transmission lines being built on narrow 65 metre wide easements because of the EMF emissions and ionized particle emissions that will come from this line, which have been proven to cause numerous diseases, including childhood leukaemia.

I FULLY oppose these applications because Transpower has falsely (and perhaps criminally) tried to justify the need for this line being built by using out of date and inaccurately high demand growth forecasts (2005 SOO), have not included the cost of environmental impacts in their justifications, and are providing misleading and inaccurate costings of the real alternative options to this line that should be considered.

Therefore:

I seek the following decision from the Board of Inquiry. That the application for Notices of Requirement and Resource Consents should be turned down completely, and Transpower directed to investigate generation, conservation and transmission alternatives that will avoid this line being built UNDER ANY CIRCUMSTANCES.

I explicitly do not want the Board of Inquiry to approve the applications subject to any conditions - I want the applications turned down in whole.
