

# URGENT

374-4  
Are you aware that the council in partnership with Mighty River Power is to allow the installation of 110, 40 story windmills both in the Turitea reserve itself and on adjacent private land ? Three end on end almost equal the height of the ranges.

- o This will permanently disfigure the hills behind the city.
- o Make Palmerston North a laughing stock. Would you like to be known as living in " Propellor city ?"
- o Jeopardise the city's water supply with the building of huge roads and infrastructure.
- o Make a few businessmen very wealthy.
- o Devalue the many properties in the area. 1000 homes affected.
- o Supply Auckland with electricity ( yes, that's right, none goes to the Manawatu - it all goes into the national grid )

The submission document is deliberately deceptive. You have until the 4th September to say

## NO

You can get a submission form from the council offices or download a copy from [www.pncc.govt.nz](http://www.pncc.govt.nz)
