

Use the tick boxes below to indicate the called-in applications for resource consent that your submission concerns.
Use a clear tick in the appropriate box or boxes (✓).

I/we make my/our submission concerning all applications for resource consent below

OR

My/our submission **only** concerns the applications for resource consent that I/we have ticked below:

Support Oppose Neutral

Manawatu-Wanganui (Horizons) Regional Council – Land-use Consents	Support	Oppose	Neutral
104553: for vegetation clearance and land disturbance in rare or threatened habitats, near streams and on highly erodible land throughout the general wind farm site.			
104554: for the construction of a double culvert in an un-named tributary of the Kahuterawa Stream as shown on the included map.			
Manawatu-Wanganui (Horizons) Regional Council – Discharge Permits	Support	Oppose	Neutral
104555: for the discharge of dust to air from the concrete batching plants to be located as generally shown on the included map.			
104556: for the discharge of dust to air from the mobile crushing plant throughout the general wind farm site.			
104557: for the discharge of wastewater from two operations and maintenance facilities to land to be located as generally shown on the included map.			
104558: for the discharge of stormwater from substations to land to be located as generally shown on the included map.			
104559: for the discharge of cleanfill to land in the form of spoil disposal sites throughout the general wind farm site.			
104560: for the discharge of stormwater from roads, turbine platforms and other areas to land.			
Palmerston North City Council – Land-use Consents	Support	Oppose	Neutral
RC0068: <ul style="list-style-type: none"> to establish and operate a wind farm in the areas within the Palmerston North city jurisdiction as generally shown on the included map to undertake earthworks associated with tracking and roading, turbine construction and associated buildings in the areas within the Palmerston North city jurisdiction as generally shown on the included map for the western side of Pahiatua Aokautere Road not meeting access requirements at the location shown on the included map for the storage of diesel (10,000 L) in bunded areas outside the Turitea water supply catchment, generally located at the two substation laydown areas shown on the included map, that exceeds the 0.2 effects ratio maximum in the rural zone for the construction of a 220 kV electricity transmission line and substations as shown on the included map. 			
Tararua District Council – Land-use Consents	Support	Oppose	Neutral
1448: <ul style="list-style-type: none"> for a wind farm (which is not listed as a permitted or controlled activity) in the areas within the Tararua District as generally shown on the included map for land disturbance of more than 200 m³ of soil and cleanfill material associated with tracking and roading, turbine construction, spoil disposal and other associated works in the areas within the Tararua District as generally shown on the included map for upgrades to South Range Road and the construction of new site access at the location shown on the included map for turbine and wind monitoring mast structures not meeting height requirements within the Tararua District for the modification of a Significant Natural Feature in Schedule 3.3 (ie, Tararua Ranges Ridgeline) for not meeting noise requirements for clearance of indigenous vegetation in the areas within the Tararua District as generally shown on the included map.

TURITEA CALL IN

Submission on Mighty River Power Ltd Applications for Resource Consent

continued: The reasons for my submission are:

Concerns about the water supply exist both during construction due to air discharge of dust and particulates from cement production, and crushing and other construction activities. These materials could be deposited directly in the reservoir or subsequently washed into the reservoir. Discharge of wastewater and storm water are also a concern. Sedimentation of the reservoir due to clearing of reserve vegetation and general construction activities threatens the water supply.

The inherent unique natural value and character of the Reserve Land and surrounding lands would be lost if the turbines were built. The Sledge Track and Hardings Park are of unparalleled value to myself, other citizens of PN and our region, as well as, visitors to our region and country. There are ample opportunities to view the existing windmills on the ranges around PN; I can see them from my kitchen window. However, it is also important and appreciated to be able to view the ranges in a more natural state without windmills. The MRP development will destroy the little remaining windmill-free outlook. I have enjoyed walks on the Sledge Track and Hardings Park as have many other PN, Manawatu residents and visitors. This a unique area of extensive native bush within a short distance from PN. My personal family commitments do not allow me time to travel far from PN and this area is a very special place for me to experience nature. Friends visiting me from England have walked the track with me on both their holidays in New Zealand. They travelled widely in NZ and have commented on the special experience provided by this area. Our experiences would be degraded by the wind farm.
