My wife and I were resident in Palmerston North for some twenty five years from the early 60's. We are very familiar with the area under the application for resource consent submitted by Mighty River Power. Similarly, we are aware of the contribution a "wind farm" can make to supporting the increasing demand for power. However, we do not believe that sufficient consideration has been given to environmental matters by the close proximity of the proposed "farm" in the Turitea area and that more consideration for the growing residential requirements needs to be reviewed to overcome the effect of noise levels and the degree of windmill appearance in the pristine area of Turitea.

We do not wish to be heard and hereby make this submission in writing only.

M J & B M Dome.
