Please tick the relevant boxes on the next page to identify whether you are making a submission on all applications for resource consent or just some of them (please identify).

Please also indicate on the back of this form () whether you support, oppose, or are neutral in relation to the applications. If you are making a submission only on parts of an application for resource consent, please note this when specifying the reasons for your submission.

The reasons for my/our submission are: To oppose local developments which threaten the existence of the natural environment and its flora and fauna and the adverse effects any such developments may have on peoples' homes, property and lifestyles. If you are attaching further information tick for yes
• While not opposed to sustainable energy, the use of the phrase, 'as generally sited' is ambiguous, therefore we oppose the wind farm in its current form. Please use more pages if you need to.

We seek the following decision from the Board of Inquiry (provide precise details including the nature of any conditions sought):

• To consider our submission and to then reconsider the wind farm project with a new proposal that is (a) environmentally friendly (ie. reconsiders land use consent no. 104553, the clearance of indigenous vegetation and not meeting noise requirements under land use consent no. 14449), and (b) more specific in its intentions. Please use more pages if you need to.

Use a clear tick in the appropriate box below ()

I/we wish to be heard in respect of my/our submission (to speak at the public hearing).
