I wish to make a submission
about the Tintea windfarm. I
have been away & only saw the
advertisement last night that
submissions are due on Monday
so couldn't get a form in that
time.

We already have a windfarm here
& do not need another one
especially when the power is
for Auckland - built the windfarm
where the power is used - Auckland
has plenty of hills.
It is beautiful to look out at the
unspoilt ranges - Yes I can see
the windmills too - & this natural
beauty is part of what attracts
tourists - it is also important
to trampers etc. Do not destroy
the environment for the sake
of people in another part of
the country!

Wind farms are not the most efficient means of power generation either as no wind means no power. Although this is a windy region there are still times when this occurs.

We already have some wind farms & we ~~should~~ ^{should} ~~not~~ ~~put~~ ~~spots~~ ~~the~~ ~~rest~~ leave the rest of the ranges in its natural state of beauty.

No one wants to see windmills from Woodville to Wellington. This would really ruin this area. Let common sense prevail & place a wind farm ^{in an area} where there isn't one so the landscape is not overtaken by windmills.

~~Hayward~~
