I/we have sent a copy of my/our submission to Mighty River Power Ltd as per Section 96(4) of the RMA.

Reasons for opposition basically are:

ruination/despoiling last remaining stretch of hills and ranges forming back drop to PN which haven't already got turbines on. There are already 366 turbines either up or consented and another 122 would cause disastrous cumulative effect - there being no views towards the hills or within the hills which won't have turbines on them. Where else in the world has a city got so many turbines?

The district has done far more than its share already towards renewable energy generation and none of this proposed addition will go to the city.

The local community in particular will suffer unfairly with noise and heavy traffic for years during construction and more noise when 122 x 125m turbines are running. This is a major concern because the current NZ standard is woefully inadequate and would not protect residents enough - especially at night - and sleep deprivation is a known form of torture.

Makes no sense to compromise the developmental potential of the foothills by having a windfarm so close especially as the flood plain is exactly that and more suitable for agriculture/horticulture.

The Turitea Reserve should never ever have what amounts to a massive power station on it not only because of it being the collection point for the city's water supply, but also for the disastrous effects of the clearing of vegetation for massive roads and turbine pads etc.
