**The reasons for my submission are:**

In principle, I am very much in favour of wind-generated power, however in the case of the proposed Turitea Wind Farm I am concerned about the impact that this will have on both the environment, and on the inhabitants of Palmerston North.

Wind turbines are proposed to be located within the Turitea Reserve, the construction of which will involve significant disruption of this natural environment. I feel strongly that as a reserve, it should be maintained in its natural state with minimal disturbance/interference by mankind.

The wind turbines are also proposed to be located within close proximity to a large population, the residents of Palmerston North. Here, I am primarily concerned about the potential negative impact of the constant low frequency noise generated from the turbines on the residents of Palmerston North; and more so, the impact that this will have on the rural residents who will live in even closer proximity to the turbines than myself. The turbines proposed will be significantly larger than those at Te Apiti, and at high density, thus there is considerable risk that the combined effects of these will be detrimental. I am also concerned about the permanent visual impact that the turbines will have on the landscape, which is the scenic backdrop to the city.
