Context:

I am a born and bred Palmerstonian and have lived here for most of my 35 years. I have resided at my current address for nearly 4 years. We bought our section in 2003, built our house and moved in May 2005, looking for a quiet retreat from the busier bustle of town. I have an interest in health and nutrition, with an undergraduate degree in Biochemistry and I have completed two postgraduate papers in Human Nutrition through Massey University.

Concerns:

As a mother, I am concerned about my family's health and wellbeing. In addition, I want to remain healthy in order to be there for my family and to provide for them. An individual's health is a key component to the ability to enjoy life, and when health is not optimal, this can impact on all aspects of someone's life. I am concerned about the proximity of many of the proposed turbines to residences, including ours, and the impact this could have on my family's health. I have heard reports of people living 3 km from turbines on Fitzherbert East Rd who have suffered sleep disturbances. Although some people may be more sensitive to the effects of turbine noise and/or vibration than others, the risk of adverse effects should be enough to ensure a precautionary approach with regard to placement of turbines.

In addition, I am concerned about the damage to the Turitea Reserve caused by construction and maintenance of the turbines. The reserve is unique within the Manawatu and for this reason turbines should not be constructed within the reserve.

Decision sought:

I wish the Board of Inquiry to decline the application in full.
