Please tick the relevant boxes on the next page to identify whether you are making a submission on all applications for resource consent or just some of them (please identify).

Please also indicate on the back of this form (✓) whether you support, oppose, or are neutral in relation to the applications. If you are making a submission only on parts of an application for resource consent, please note this when specifying the reasons for your submission.

The reasons for my/our submission are:

See accompanying email.

If you are attaching further information tick for yes

Please use more pages if you need to.

I/we seek the following decision from the Board of Inquiry (provide precise details including the nature of any conditions sought):

Decline the resource consents for the whole project or at the very least, put a hold on this project (and all other) until a national strategy for wind farms can be developed.

Please use more pages if you need to.

Use a clear tick in the appropriate box below (✓)

I/we wish to be heard in respect of my/our submission (to speak at the public hearing).

I/we DO NOT wish to be heard and hereby make my/our submission in writing only.

Signature(s):

Date: 22 February 2009

(Signature of submitter, or person authorised to sign on their behalf is required. Note signature is not required for electronic (email) submissions. If this is a joint submission by two or more individuals, each individual's signature is required.)

Reasons for my submission:

- Location is too close to existing large population centre (Palmerston North), and existing urban areas, e.g., Pacific Drive (noise, visual impact)
- We already have a number of wind farms in the area. I am keen to see more electricity generation from renewable energy resources, and have not objected to any others – even one that is closer to my “back yard,” but this location should not be used
- Wind farm should not be in a reserve area or close to it – this should be kept free of industrialisation, and it’s particularly inappropriate for a water catchment area.
- Loss of wilderness area amenity value – proximity to Sledge Track (a valuable 30min to 6.5 hour bush walk only 20 minutes’ drive from city centre).
- Visual impact from Palmerston North – too close down on hills, not just up on ridgeline.
- Not fair for neighbouring land occupiers who get no financial benefit from a turbine sited on their land, but lose enjoyment of their land, and land value because of turbine’s proximity – some right on their boundary.
- Need a national strategy (national co-ordination of wind farm location) – would make more sense to have wind farms in different locations around NZ which would be more likely to be blowing at different times, rather than concentrated in a few areas where the wind will not be blowing all the time.
