Subject: proposed national policystatement re fw management
Attachments: Proposed National Policy Statement for Freshwater.wpd

Herewith (I hope) a copy of a submission on the freshwater management policy etc.

I did not find this a very easy topic to cope with in terms of your processes. I hope the sweat I put into it wasn't wasted. I could not avoid the feeling that the person handling it knew all about red tape, but little about water, and the information that should (in my view) underpin its management.

Hope all is well.

A hard copy will be in tomorrow's post-- with you by Friday.
