

Your submission to Zero Carbon Bill

Robert Wilson, **Robert David Wilson**

Reference no: 12001

Submitter Type: Individual

Clause

1. What process should the Government use to set a new emissions reduction target in legislation?

Notes

Shouldn't set emission targets

Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

Notes

No target

Clause

3. How should New Zealand meet its targets?

Notes

Do nothing

Clause

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

Position

Yes

Notes

Clause

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

Position

No

Notes

Clause

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

Position

No

Notes

Clause

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?

Position

No

Notes

Clause

Do you have any other comments you'd like to make?

Notes

It's a complete nonsense. The so-called scientific consensus is irrelevant. Science is about data. The FACT is that such data is publicly available from authoritative sources. This includes organisations such as NASA (including its various satellites such as the NSIDC), the EPA and even Google Earth. Let's take a simple example. The NSIDC commentary on Antarctic sea ice indicates that the continent has been gaining an additional 1.8% of ice over the past 3 decades. When you follow a link from NSIDC to Google Earth you are presented with a time lapse series of images (1979-2018) that shows absolutely no change in the amount of ice present in Antarctica and yet we have been told only recently that we should all be alarmed by the impact of climate change in the region. Also

we have been told that we have been facing unprecedented levels of record temperatures. This information is derived from tortured data that comes from surface based temperature measurements. Satellite measurements are infinitely more accurate and can monitor temperatures anywhere in the world. The UAH (University of Huntsville Alabama) show that temperatures are not tracking up and if anything are trending down. These are only a small number of examples. There are many more. They indicate that what is passing as science is nothing of the sort but is propaganda of a quality that Joseph Goebbels would be proud of. So to do something about a non issue is the very definition of stupidity.
