Dear sir or madam It has been brought to my notice that the National party are considering giving the nations water resource to Maori to control Which I totally oppose. John Key has stated that no one person owns the water yet if control is given over to the Iwi, a corrupt political organisation in many cases who do not pay rates and will want everyone else to pay all costs. This is a major bad move for the party and the country. Sure the waterways need to be looked after but giving it to the people who are least likely to do this is total stupidity. Look at the neglected state of the majority of Maori land for example and how much fisheries quota has been sold off to overseas companies etc. I am a National voter but this is political suicide.
