submission on freshwater resources being governed by iwi

**Date:**

Monday, 4 April 2016 4:44:42 p.m.

---

I am writing this submission to protest at the continual subversion of our national assets to a race based minority.

It is a deplorable and sad overreach of an elected government to hand control of the freshwater resources of our country to a minority group which will disadvantage the rest of this country.

By handing over management of freshwater resources to Maori you are taking another step towards a racially divided country.

Now we are ever creeping towards having two sets of laws and a minority group holding the majority of New Zealanders captive? This is blatant reverse racism.

This government has done more to ruin our country in less time than any other and I will not vote for a National government ever again.

I also wish to protest at the manipulation of the Resource Management Act which is now set to interpose iwi control and consultation in areas which are not warranted, needed or wanted and provide another opportunity for greed and revenue gathering where common sense cannot prevail and that disadvantages the majority of New Zealanders.

Yours faithfully  
Julie Purdy
