

Your submission to Clean Water

**Clause**

What are your thoughts on the proposed swimming targets, for example, on the timeframes and categories?

Notes

Timeframe is way too long, and the definition of swimmable (basically 1 swimmer in 20 will get sick, and 10% of the time it will be worse than that) is laughable. Would you eat in a restaurant where more than 1 in 20 diners gets sick? The targets also don't take any account of the over-extraction of water from many rivers, leaving many popular rivers and swimming holes dry.

Clause

What are your thoughts on the proposed stock exclusion regulation, for example, the timeframes and stock types to be excluded?

Notes

Why so long? How long does it take to build a fence?

Clause

Do you have any other comments on the contents of the Clean Water discussion document?

Notes

This is a staggeringly cynical move in an election year, an attempt to to steal a Green policy that clearly resonates with the public while being able to reassure the agricultural industry that any changes will be glacial in pace and minimal in impact.
