

Your submission to Clean Water

**Clause**

What are your thoughts on the proposed swimming targets, for example, on the timeframes and categories?

Notes

Time frame: Way too long, and also concentrate on all the industries that are allowed to dump their toxic wastes into the waterways. Stop allowing farmers to own land that is meant to be kept for recreation purposes close to waterways. Stop all extra watering taken for any industries, the rivers are low, or nonexistent, already, and with global warming it's only going to get worse.

Clause

What do you think about the proposed amendments to the Freshwater NPS?

Notes

Too long time ever frame, and standards are way too low.

Clause

What are your thoughts on the proposed stock exclusion regulation, for example, the timeframes and stock types to be excluded?

Notes

Time frame too long, and all stock should be kept out of all waterways, even if it is on the farmers properties. There are farmers who are finally doing a lot of good on the land, replanting certain areas, keeping wet lands etc, but there needs to be more, with some sort of Government help, as all Governments have allowed too many farmers do what they want, when they shouldn't have.
