

Your submission to Clean Water

**Clause**

What are your thoughts on the proposed swimming targets, for example, on the timeframes and categories?

Notes

As a layman I trust in the prior Health department statistics as an absolute maximum level, but would hope for better than that ultimately.

Clause

What do you think about the proposed amendments to the Freshwater NPS?

Notes

It is a disgrace to be allowing our pure groundwater to be bottled and sold. Especially when we Kiwis pay for water. No to allowing water companies to appropriate and sell our water.

Clause

What are your thoughts on the proposed stock exclusion regulation, for example, the timeframes and stock types to be excluded?

Notes

Scientific fact shows better care, ie shade coverage and less numbers provide better quality and almost the same quantity as stretching the land resources to their limits with already proven destructive factory farming type models. Turning every available acre into cattle pastures is not only destructive to our own land and resources but to the planet as a whole. Can you say counterproductive?
