

Your submission to Clean Water

**Clause**

What are your thoughts on the proposed swimming targets, for example, on the timeframes and categories?

Notes

The ecological health of freshwater determined by scientific methods recommended the Land & Water Forum in August 2016 is absolutely the best measure of freshwater health. Swimmability has negligible scientific basis and is a gimmick to fool the public.

Clause

What do you think about the proposed amendments to the Freshwater NPS?

Notes

They are very weak. National, enforceable standards are required for nitrogen and phosphorus. Councils have shown repeated unwillingness to enforce themselves.

Clause

What are your thoughts on the proposed stock exclusion regulation, for example, the timeframes and stock types to be excluded?

Notes

All stock must be excluded, with cattle the highest priority as the worst offenders.

Clause

Do you have any other comments on the contents of the Clean Water discussion document?

Notes

The government was on the right track with the Land and Water Forum, then reverted to political, rather than scientific, conclusions. Weak and shameful result.
