Submisson on the Water 2017 Consultation

[REDACTED]

To the Environment Minister,

Our clean water is not infinite. We need to look after it to all be healthy and happy. Changing the perception of what is clean doesn't cut it. We need to look after it or who will? Please think of the people and the generations to come. This is not a an issue for a short term fix. We need to take responsibility and take it now. Please look after the water of this land, you have the power to, the voice and people relying on you to make the right decision for our future, we all need it.

I don't want to have my name published on the MFE website, or released via OIA - yes
