

Your submission to Clean Water

**Clause**

What are your thoughts on the proposed swimming targets, for example, on the timeframes and categories?

Notes

A Big fat joke that is putting short term cost cutting ahead of the long-term health of our children & future generations. Isn't it the councils' and government's job to look after its people? How did they lose sight of this? When did greed and job security override our health and well being? They are damaging their own whanau's health as well or do they really not see that? And if they can only think in monetary terms they're reducing our tourism potential.

Clause

What do you think about the proposed amendments to the Freshwater NPS?

Notes

As a teacher as well as a parent I find it incredulous that this is seen as a solution!. The NPS needs to have much stricter protections of our waterways not less!

Clause

What are your thoughts on the proposed stock exclusion regulation, for example, the timeframes and stock types to be excluded?

Notes

Alternatively get farmers to pay for the proper waste care of their livestock. How hard is it to put fences up for a start? If they can't afford it then they need to reduce their stock. Consumers need to pay more for their dairy & beef products as well. It's the same when there's a drought; they never pay for the irrigation or seem to be prepared. They wait for the taxpayer to compensate them.

Clause

Do you have any other comments on the contents of the Clean Water discussion document?

Notes

Stop fiddling while Rome burns! Now is your chance to make a difference and do the decent thing. Something to tell your mokos; I presided over the biggest water pollution catastrophe OR I stood up for the health and well-being of the nation.
