

# Your submission to Clean Water

**Clause**

What are your thoughts on the proposed swimming targets, for example, on the timeframes and categories?

**Notes**

the gerrymandering of the targets are too complex, confusing and will prove to be ineffective, and the time frame far too long. The horse has bolted, so stricter controls are needed.

**Clause**

What are your thoughts on the proposed stock exclusion regulation, for example, the timeframes and stock types to be excluded?

**Notes**

it is absolutely vital that stock be excluded from access by legislation if not voluntarily, and the fencing needs to be back sufficiently far to effectively prevent sediment and nitrates getting into the waterway, with riparian planting, paid for by any fines imposed for non compliance. Economic benefits must not take priority over Environmental considerations. which will in the long run benefit this country economically, culturally and aesthetically.

**Clause**

Do you have any other comments on the contents of the Clean Water discussion document?

**Notes**

industrial, commercial and residential areas need to be kept litter free to prevent rubbish getting into the waterways and harming what is left of marine life. also i grew up in, on and beside the River Thames in UK when you couldn't see your hand under the water and vitually no fish life. It is now, and has been for many years, clear, with weed and fish life returned through strict "enforced" regulations
