I want to protest at the government's lowering of water quality standards and threat that constitutes to the seriously diminishing numbers of native flora and fauna that inhabit or exist alongside our streams, lakes and rivers.
We need to preserve the species threatened by poor water quality and make our waterways safe for all New Zealanders - and our overseas visitors- to swim and enjoy as we have done in the past.
Please listen to the submissions of Forest and Bird in particular on this issue
Donn Armstrong
