---

To whom it may concern,

The Government has made it clear that it is not serious about climate change.

The Government continues to say that climate action is too expensive, yet not consider the costs of doing nothing while overlooking the financial and job creation benefits of moving towards a cleaner, safer future.

Without a real action plan, there are certain to be wrecking of the local economy.

Please do not shut out a cleaner, smarter and safer future.

Sincerely,

Jane Beattie
