Dear Mr Grosser,

Please be aware that we may have a chance to improve the health of our planet.

Please listen to those who speak from this perspective and task PRECAUTIONARY PRINCIPALS. We can never undo time!! NOW is the TIME to be responsible. Stop waste. Take care of people and our planet.

We are a small country with a tiny number of people. We don't have wars on our borders, we don't have famine, we are very blessed. We need to ensure we are leading with our responses to climate concerns.

Please review and be bold and brave. Be heros and take/make the path that will MAKE THE URGENT CHANGE.

regards

Fay Brorens
