

# Your submission to Clean Water

**Nancy Chaves**

**Clause**

What are your thoughts on the proposed swimming targets, for example, on the timeframes and categories?

**Notes**

I am appauled. The water ways need a massive iver you and proceeds actually need to be put in place to stop pollution getting into the water.

**Clause**

What do you think about the proposed amendments to the Freshwater NPS?

**Notes**

Rubbish, fix the problem at its cause. I.e stop cow shit entering waterways by planting flaxes/ plants along the water edges. The proposed amendments are trying to patch a problem rather than fix it

**Clause**

What are your thoughts on the proposed stock exclusion regulation, for example, the timeframes and stock types to be excluded?

**Notes**

Should be better

**Clause**

Do you have any other comments on the contents of the Clean Water discussion document?

**Notes**

All water ways and how they are treated need a massive over haul, 1080, round up and other toxicons should no be used along water ways egdes (again there should be plants),sediment catchments need to be inforced.
