

Your submission to Zero Carbon Bill

Reference no: 23

Submitter Type: Individual

Clause

1. What process should the Government use to set a new emissions reduction target in legislation?

Position

The Government sets a 2050 target in legislation now

Notes

Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

Position

Net Zero Emissions - Net zero emissions across all greenhouse gases by 2050

Notes

Clause

3. How should New Zealand meet its targets?

Position

Domestic emissions reductions only (including from new forest planting)

Notes

Clause

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

Position

No

Notes

Only if it can be achieved earlier.

Clause

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

Position

Yes

Notes

Clause

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

Notes

All options seem too risky. In all of the options, new government can set a huge emissions budget for the future and there's no way to change that for the next 15 years.

Clause

7. Should the Government have the ability to review and adjust the second emissions budget within a specific range under exceptional circumstances? See p36 Our Climate Your Say

Position

Yes

Notes

Clause

8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account when advising on and setting budgets? See p44 Our Climate Your Say

Position

Yes

Notes

Clause

9. Should the Zero Carbon Bill require Governments to set out plans within a certain timeframe to achieve the emissions budgets?

Position

Yes

Notes**Clause**

10. What are the most important issues for the Government to consider in setting plans to meet budgets? For example, who do we need to work with, what else needs to be considered?

Notes

1. How do you make sure that polluters will comply 2. How do you make sure that future governments will take it seriously

Clause

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

Position

Yes

Notes**Clause**

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

Position

Makes decisions itself in respect of the number of units available in the NZ ETS

Notes**Clause**

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

Position

Yes

Notes**Clause**

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

Position

No

Notes

I think it should be handled separately, because this could increase the scope of the bill too much that it becomes hard to pass. It would could require a lot of future changes to the bill.

Clause

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?

Position

Yes

Notes**Clause**

Do you have any other comments you'd like to make?

Notes

This bill is important for our future, I hope you'll make it work. Re my data sharing consent... I'm happy for my submission to be put on your website, but please remove my name and email from it. Online privacy is a bit of a concern these days. Thank you.
