

Your submission to Zero Carbon Bill

Wolf, **Wolf Ammon**

Reference no: 70

Submitter Type: Individual

Clause

1. What process should the Government use to set a new emissions reduction target in legislation?

Position

The Government sets a 2050 target in legislation now

Notes

Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

Position

Net Zero Emissions - Net zero emissions across all greenhouse gases by 2050

Notes

Clause

3. How should New Zealand meet its targets?

Position

Domestic emissions reductions (including from new forest planting) and using some emissions reductions from overseas (international carbon units) that have strong environmental safeguards

Notes

Clause

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

Position

Yes

Notes

Clause

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

Position

Yes

Notes

Clause

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

Position

Yes - each incoming Government should have the option to review the third budget in the sequence

Notes

Clause

7. Should the Government have the ability to review and adjust the second emissions budget within a specific range under exceptional circumstances? See p36 Our Climate Your Say

Position

Yes

Notes

Clause

8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account when advising on and setting budgets? See p44 Our Climate Your Say

Position

Yes

Notes**Clause**

9. Should the Zero Carbon Bill require Governments to set out plans within a certain timeframe to achieve the emissions budgets?

Position

Yes

Notes**Clause**

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

Position

Yes

Notes**Clause**

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

Position

Yes

Notes**Clause**

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

Position

Yes

Notes**Clause**

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

Position

Yes

Notes**Clause**

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?

Position

Yes

Notes**Clause**

Do you have any other comments you'd like to make?

Notes

Regarding clean Power Generation: Government could buy, say 100000 solar power systems in China and selling with a small profit (to cover the interest/ opportunity cost) to residents. Germany is producing 15-20% of power generated from solar systems on houses-, barns-, company- roofs. Why can we not with more sunshine in NZ? Regarding "clean" Economy: We could establish thriving Kur House Centers in Northland (expanding to alternative treatment, health tourism). All it needs is the expertise (can get a Kur-Doctor from Europe and Physiotherapist), fresh air and water. This is not available in New Zealand, but in Germany there a hundreds of Kur-cities/ villages (called Bad/ Bath-cityname) providing these health services (degenerative disease, stress related dysfunctions etc), particularly in areas with no income from industries (North Sea Coast and Bavaria). The "patients" live in private accommodations (quality assured!) providing income for the population, also need small group tramping guides (lots of walking, cycling). The city is charging a Kur-tax per night to provide some services and beautifying the city/village. I can provide more information if requested.
