

Your submission to Zero Carbon Bill

Hadyn James

Reference no: 139

Submitter Type: Individual

Clause

1. What process should the Government use to set a new emissions reduction target in legislation?

Notes

As I don't believe carbon emissions affect the climate at all. None of the above

Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

Notes

None of the above. The current levels are acceptable.

Clause

3. How should New Zealand meet its targets?

Notes

None of the above. Don't set limits as the climate change global warming is a farce.

Clause

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

Position

No

Notes

The government should instead invest in removing plastics from the environment

Clause

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

Position

Yes - each incoming Government should have the option to review the third budget in the sequence

Notes

Clause

7. Should the Government have the ability to review and adjust the second emissions budget within a specific range under exceptional circumstances? See p36 Our Climate Your Say

Position

Yes

Notes

Clause

8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account when advising on and setting budgets? See p44 Our Climate Your Say

Notes

No. Climate change is the latest way to tax stupid people. Climate change is a natural and normal process. Mankind could not change it if we tried.

Clause

10. What are the most important issues for the Government to consider in setting plans to meet budgets? For example, who do we need to work with, what else needs to be considered?

Notes

The government should have a serious look at the science and where the money trail ends. I mean honestly how does paying a tax really help the environment?

Clause

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

Position

No

Notes

Clause

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

Notes

Again it's a farce.

Clause

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

Position

No

Notes

No I don't agree. Simply because these people believe in this farce. Mandatory group psychosis

Clause

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

Position

No

Notes

Clause

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

Position

No

Notes

Clause

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?

Position

No

Notes

Clause

Do you have any other comments you'd like to make?

Notes

What a massive waste of time and money. In the 1970's these sane scientists were worried about global cooling. In the 1400's Europe suffered a mini Ice age.. I could go on. Climate change is a natural phenomenon that has been happening since the dawn of time. Ask the dinosaurs
