-----Original Message----- From: Hein-Patriok Sent: Thursday, 7 June 2018 1:27 PM To: Climate Change Subject: Climate Change Hi, a very laudable attempt which can be tipped over/modified by consecutive Governments as we see happening in the big Politics right now. The Crushers of NZ will not hesitate to adapt their master's example. Immediate actions seem more adequate. Why do the Greens support the immense pay-outs to private Enterprises ("Farmers")-who as a whole must have disregarded NZ-laws or the intentions of these laws. \*\*Some of the above mentioned sums should be diverted into the prosecution of the guilty people, perhaps including farmer(s) \*\*and the rest should be used for the noble intentions which are addressing the Climate change. That would go a long way supporting e-car-buyers and investment into alternative Energy-production-systems I am a Veterinarian and I very much doubt the eradication-plans for Mycoplasma bovis to have any chance of succeeding-looking at the farming=practises of NZ. And ! having had an intensive experience(~30 years) of the further processing-practises (Milk-products and Meat) : No show! It will re-appear from the "underground" again-after "eradication". It's in the National Herd. Basta ! VR Patrick
