A climate law like the Zero Carbon Act is important because...	If we are not changing things for the better today we are just making it worse for our selves and the planet tomorrow.
Long-term target	I support the most ambitious target of reducing total greenhouse gases to net zero by 2050 or sooner. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.
Climate Commission	I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.
Adaptation	I support a plan for adaptation being included in the Zero Carbon Act.
Climate justice	
Further comments	This needs to happen now not tomorrow.
