<b>A climate law like the Zero Carbon Act is important because...</b>	Because we need to preserve the country that we have so that future generations can have the same quality of life that we have. If NZ doesn't start putting in place acts like this then what country will? Instead of just claiming that we are clean and green we must be people of our word and do something.
<b>Long-term target</b>	I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.
<b>Climate Commission</b>	I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.
<b>Adaptation</b>	I support a plan for adaptation being included in the Zero Carbon Act.
<b>Climate justice</b>	A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.
<b>Further comments</b>
