<b>A climate law like the Zero Carbon Act is important because...</b>	The science tells us that we are destroying the sustainability of our life giving resources like air and water.
<b>Long-term target</b>	I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.
<b>Climate Commission</b>	I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.
<b>Adaptation</b>	I support a plan for adaptation being included in the Zero Carbon Act.
<b>Climate justice</b>	A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.
<b>Further comments</b>	Time is of the essence here, and much of this work should have been done "yesterday". Hopefully we are not too late in rectifying our bad habits in destroying the only home we have. Migration to other planets is not a option for a very long time!! Please take this through the legislative process as a priority. Many thanks for your attention.
