| A climate law like the Zero Carbon Act is important because... | I support strong climate law such as the Zero Carbon Act because I am concerned about the impact that warmer temperatures will have on our Aotearoa as we know it., our ability to grow the crops that we do and being an island nation we are already seeing the devastating impacts that rising sea levels can have like on the West Coast of the South Island. |
| Long-term target | Everyone will benefit from the total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: We should aim for negative levels of all gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits because we should not have to ride the coat tails of others achievements we should be able to pave the way for our own sustainable society. |
| Climate Commission | I believe the only way this will be effective is with the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions. |
| Adaptation | I support a plan for adaptation being included in the Zero Carbon Act. |
| Climate justice | A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations. |
| Further comments | The decision for this policy needs to be based not on the currency of money but on the currency of quality of life. |
