<b>A climate law like the Zero Carbon Act is important because...</b>	We require this law to make people think and act rather than believe it is someone elses problem.
<b>Long-term target</b>	I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.
<b>Climate Commission</b>	I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.
<b>Adaptation</b>	I support a plan for adaptation being included in the Zero Carbon Act.
<b>Climate justice</b>	A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.
<b>Further comments</b>	We need to do whatever we can to help reduce carbon emissions. Things big and small help You may think what is the point but the point is anything is better than nothing, please support this campaign, help our planet survive a little longer for future generations.
