A climate law like the Zero Carbon Act is important because...	You only need to see whats happening around us day by day to be concerned. I cant fathom how intelligent people of power cant seem to grasp that without the resources and sustenance the earth provides, we as humans have no way to survive. How can the idea of prosperity drive you to ignore that without an economy, the value of money = 0. We have a responsibility to our children and their children to respect what god so graciously gave us and do everything to ensure we dont destroy their home.
Long-term target	I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.
Climate Commission	I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.
Adaptation	I support a plan for adaptation being included in the Zero Carbon Act.
Climate justice	A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.
Further comments	Be bold for a change. Do something different. Create jobs, entire new business prospects, nurture the land and reap what you sow. We are always so far behind everybody else. Can we be first for a change
