<b>A climate law like the Zero Carbon Act is important because...</b>	We are on the tipping point of ongoing extreme weather events. The Government must step up to enact this Act into law in line with the Paris Accord. The Zero Carbon Act must include all farming, industry and commerce; anything less is unacceptable.
<b>Long-term target</b>	I support the most ambitious target of reducing total greenhouse gases to net zero immediately. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.
<b>Climate Commission</b>	I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.
<b>Adaptation</b>	I support a plan for adaptation being included in the Zero Carbon Act.
<b>Climate justice</b>	A Zero Carbon Act must be just and fair and avoids passing on the costs to future generations.
<b>Further comments</b>	Climate change is the single most significant and pressing global challenge facing us. I believe any action will not be enough.
