### A climate law like the Zero Carbon Act is important because...
There is definite climate change/warming & one does want the world to continue the best it can- once sea level rises, the polar ice melts (glaciers breaking off) the whole eco system is affected including wild life. There are enough man-made problems as it is so do NOT contribute to more!

### Long-term target
I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.

### Climate Commission
I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.

### Adaptation
I support a plan for adaptation being included in the Zero Carbon Act.

### Climate justice
A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.
