<b>A climate law like the Zero Carbon Act is important because...</b>	Not just this Country but our World needs to have a 'Zero Carbon Act'. What sort of future are we bringing children into? What about the children's, children? We made this mess & it's up to 'us' as individuals, communities, Countries & part of the Earth we all live on to make changes NOW. Climate change affects everyone & every-living thing around us. It affects our health, the food we eat, the air we breath & our oceans & all that live in, on & around them.
<b>Long-term target</b>	I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.
<b>Climate Commission</b>	I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.
<b>Adaptation</b>	I support a plan for adaptation being included in the Zero Carbon Act.
<b>Climate justice</b>	A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations. We need to make sure that those that follow after we have gone have clean air, fresh water, healthy food to grow & eat. Keep our Rivers, Seas & Oceans clean with abundant sea life living in clean water.
<b>Further comments</b>	As a Grandmother I worry about my Grandchildren's future & the future of their children. I want to rest peacefully knowing we have done our best to give following generations the things we took for granted as children.
