A climate law like the Zero Carbon Act is important because...	I live in Fiji and I experience the effects of climate change on a daily basis (the temperature is rising and its getting hotter during summer). Also, the sea level is rising and affecting our low lying areas especially when there's even a slight heavy rain and many are forced to leave their homes and evacuate.
Long-term target	I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.
Climate Commission	I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.
Adaptation	I support a plan for adaptation being included in the Zero Carbon Act.
Climate justice	A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.
Further comments	I would strongly suggest this law be passed and enforced throughout the whole of NZ and also enforce this law in Fiji to help us help the earth and save lives from climate change!
