

# Your submission to Zero Carbon Bill

**Reference no:** 1607

**Submitter Type:** Individual

**Clause**

1. What process should the Government use to set a new emissions reduction target in legislation?

**Position**

The Government sets a 2050 target in legislation now

**Notes**

**Clause**

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

**Position**

Net Zero Emissions - Net zero emissions across all greenhouse gases by 2050

**Notes**

**Clause**

3. How should New Zealand meet its targets?

**Position**

Domestic emissions reductions only (including from new forest planting)

**Notes**

**Clause**

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

**Position**

No

**Notes**

**Clause**

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

**Position**

Yes

**Notes**

**Clause**

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

**Position**

No - emissions budgets should not be able to be changed

**Notes**

**Clause**

7. Should the Government have the ability to review and adjust the second emissions budget within a specific range under exceptional circumstances? See p36 Our Climate Your Say

**Position**

No

**Notes**

**Clause**

8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account when advising on and setting budgets? See p44 Our Climate Your Say

**Position**

Yes

**Notes**

**Clause**

9. Should the Zero Carbon Bill require Governments to set out plans within a certain timeframe to achieve the emissions budgets?

**Position**

Yes

**Notes****Clause**

10. What are the most important issues for the Government to consider in setting plans to meet budgets? For example, who do we need to work with, what else needs to be considered?

**Notes**

Planning and resourcing the transition will be critical, especially for regions such as Taranaki. There will be resistance from the public unless the path is made easy and resourcing made readily available to smooth the transition.

**Clause**

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

**Position**

Yes

**Notes****Clause**

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

**Position**

Makes decisions itself in respect of the number of units available in the NZ ETS

**Notes****Clause**

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

**Position**

Yes

**Notes**

However I think that the following is also essential not desirable: • business competitiveness • knowledge of the public and private innovation and technology development system

**Clause**

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

**Position**

Yes

**Notes****Clause**

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

**Position**

Yes

**Notes**

There will need to be a trickle down effect to local government. There needs to be guidance and resourcing of regional and local councils in order for this Bill to have maximum impact.

**Clause**

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?

**Position**

Yes

**Notes****Clause**

Do you have any other comments you'd like to make?

**Notes**

I'm really pleased to see central government leading on this matter. If we can transition well we have the ability to lead globally in

innovations within the agriculture, dairy, viticulture, movie and tourism sectors.
