Dear Ministry for the Environment,

I believe in a net-zero carbon future for New Zealand. We need to make dramatic reductions in our emissions to keep climate change limited to 1.5 degrees and ensure our precious native plants and animals are protected. Nature is our taonga and we cannot exist without it. We must act together.

The key things I support in a Zero Carbon Act are:

- target for net-zero carbon emissions by 2040 should be in the Act.
- The emissions from transport, industrial activity, agriculture, and all other sources should be included in the target. Even 'short-lived' gasses can have a huge effect on our climate and need to be reduced.
- Emissions budgets should be at least as important as fiscal budgets, and the Government should set plans to achieve them.
- An independent Climate Change Commission of experts should monitor emissions and give advice to keep New Zealand on-track for its emissions reduction goals.

My details and further comments on my submission:

Is there anything you'd like to add?

We need our government to lead the way. I don't think it is fair to leave the growing number of environmental challenges to our children. People won't make changes necessary without strong leadership. I love the story of how we changed the growth of the hole in the ozone layer. That took global action - like this needs global action.

Please ask the Ministry for the Environment to withhold my name and personal details from public posting

No

I would like Forest & Bird to contact me about future campaigns and other matters of interest

No
