

Your submission to Zero Carbon Bill

grant michael hammond

Reference no: 1773

Submitter Type: Individual

Clause

1. What process should the Government use to set a new emissions reduction target in legislation?

Notes

This question is loaded!. Where is the option to select..."no target"?? Setting any target for carbon dioxide emission reduction is futile as it will have no effect of world climate and cost ratepayers for no benefit

Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

Notes

again this question is loaded and will not provide a balances answer!. Whoever prepared this questionnaire has obviously already decided the outcome and is just presenting question to support it.. There is no scientific data to support man made climate change, and the benefits of increased levels of carbon dioxide far outweigh the adverse impacts, yet all the bias research is focused on the adverse impacts with no recognition of the benefits

Clause

3. How should New Zealand meet its targets?

Notes

it shouldnt be setting a target

Clause

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

Position

Yes

Notes

What sane person would set a target that cannot be reviews if circumstances change. That is just plain dumb..Only the Greens who do not consider individual citizens financial situation would put our country in such a stupid legal position

Clause

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

Position

Yes

Notes

only if these budgets recognize the true cost of this flawed policy on climate change

Clause

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

Position

Yes - each incoming Government should have the option to review the third budget in the sequence

Notes

for gods sake, a budget is just a best guess at the time it is made. Government MUST be able to review as circumstances change

Clause

7. Should the Government have the ability to review and adjust the second emissions budget within a specific range under exceptional circumstances? See p36 Our Climate Your Say

Position

Yes

Notes

Clause

8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account

when advising on and setting budgets? See p44 Our Climate Your Say

Position

Yes

Notes

Clause

9. Should the Zero Carbon Bill require Governments to set out plans within a certain timeframe to achieve the emissions budgets?

Position

Yes

Notes

Clause

10. What are the most important issues for the Government to consider in setting plans to meet budgets? For example, who do we need to work with, what else needs to be considered?

Notes

set back and take a real hard look at the bullshit propoganda around the supposed climate change. Global temperatures are falling not rising. there is significantly greater benefits in higher levels of carbon dioxide, than lower yet all the recent "climate change" research has been bias on the adverse impact with no consideration of hte benefits.

Clause

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

Position

Yes

Notes

Clause

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

Position

Advising the Government on policy settings in the NZ ETS

Notes

Clause

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

Notes

the committee makeup MUST include experts whos position holds that climate change is not man made as the "science is NOT settled" and there are many experts who do not agree with the current fashionable mantra that climate change is man made

Clause

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

Position

Yes

Notes

For f.ks sake, the whole point of this bill is for our Government to put in place measures to manage the supposed man made climate change. This question is pointless!

Clause

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

Notes

page 47 does not list any "functions" so have no idea what this question relates to

Clause

Do you have any other comments you'd like to make?

Notes

This form is a loaded questionnaire and does not represent a submission that represents my personal view. It presents questions that support a pre-determined outcome and should not be used as evidence of consultation and the publics collective position on this bill
