

# Your submission to Zero Carbon Bill

ian johnstone

## Reference no: 1815

**Submitter Type:** Individual

### Clause

1. What process should the Government use to set a new emissions reduction target in legislation?

### Notes

THE SCIENCE IS NOT SETTLED

### Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

### Notes

Co2 helps increase growth rate of plants. Plants take on Co2. It is NOT a pollutant.

### Clause

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

### Position

Yes

### Notes

### Clause

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

### Position

No

### Notes

### Clause

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

### Position

Yes - each incoming Government should have the option to review the third budget in the sequence

### Notes

### Clause

7. Should the Government have the ability to review and adjust the second emissions budget within a specific range under exceptional circumstances? See p36 Our Climate Your Say

### Position

Yes

### Notes

### Clause

10. What are the most important issues for the Government to consider in setting plans to meet budgets? For example, who do we need to work with, what else needs to be considered?

### Notes

Perhaps considering that ALL modelling of climate change has been wrong. Basing any targets on these is simply fraud

### Clause

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

### Position

No

### Notes

### Clause

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme

(NZ ETS)?

**Notes**

Not required

**Clause**

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

**Position**

No

**Notes**

**Clause**

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

**Notes**

All funding should be aimed towards adaptation rather than on something that will not change 'climate change'

**Clause**

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

**Position**

No

**Notes**

**Clause**

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?

**Position**

No

**Notes**

**Clause**

Do you have any other comments you'd like to make?

**Notes**

If I were to bet on a horse in a race with two mutated feet (ie climate modelling) I would be called stupid. This is what is intended to be forced upon we the people. Offer a referendum on this in the next electoral process and let the people decided.
