<b>A climate law like the Zero Carbon Act is important because...</b>	I worry for our future generations, let's lead by example now.
<b>Long-term target</b>	I support the most ambitious target of reducing total greenhouse gases to net zero by 2040. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.
<b>Climate Commission</b>	I support the establishment of an independent Climate Commission that is made up of industry experts and leading researchers, which helps make informed and calculated final decisions.
<b>Adaptation</b>	I support a plan for adaptation being included in the Zero Carbon Act.
<b>Climate justice</b>	A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.
<b>Further comments</b>	Let's see a strong government proposal to increase the use of hybrid, electric and low emission vehicles, that benefits all citizens, not just the wealthy.
