The Government sets a 2050 target in legislation now

Net Zero Emissions - Net zero emissions across all greenhouse gases by 2050

**Clause**
10. What are the most important issues for the Government to consider in setting plans to meet budgets? For example, who do we need to work with, what else needs to be considered?

**Notes**
There will probably be many lobbyists from big corporations (eg. car companies, agrochemistry, farmers etc.) working against this. If one could try to include them in a good way and make them part of the change that would pay off I'd think.
