A climate law like the Zero Carbon Act is important because...	I believe that we should be having a zero carbon law because otherwise, dealing with climate change will only get more difficult.
Long-term target	Reducing total greenhouse gases to net zero by 2050 should be the absolute minimum. We should achieve this without carbon credit trading internationally (zeroing within NZ).
Climate Commission	A Climate Commission to advise the government independently would be useful.
Adaptation	I support a plan for adaptation being included in the Zero Carbon Act.
Climate justice	A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.
